**Subject:** Free LC Seminar in Cambridge, MA: Developing Robust LC Methods

**Free Educational Seminar  
Developing Robust LC Methods**

**Selectivity. Resolution. Robustness.**

During this full-day seminar, we'll take these fundamental concepts and apply them to the method development, optimization, validation, and transfer process. Join us for discussions on how method developers are building robustness into their LC methods and how this can impact method validation and transfer.

Discussion topics will include:

- The Fundamentals of Method Development
- System Considerations for Method Development
- Automating LC Method Screening, Optimization, and Robustness Modeling
- Method Validation and Transfer
